

GENERAL HEADQUARTERS  
UNITED STATES ARMY FORCES, PACIFIC

CHECK SHEET

(Do not remove from attached sheets)

File No. Subject: Questions Raised at Tech. Intell. Conference.

FROM: G-2, WDIT. TO: DATE: 31 Oct 45.  
(Tech. Intell.)

The four questions raised at the conference of Technical Intelligence representatives with WDIT Section, G-2, on 23 October, have been answered by the D C/S as follows:

1. Sixth and Eighth Armies and XXIV Corps have been asked to submit new target dates for completion of destruction of enemy material. These new dates will be published later.

2. The following policies are established:

a. Documents in the hands of private individuals but deemed necessary to the proper investigation of Japanese industry, science or research may be seized by investigators. In the event the documents are discovered to have no connection with Japanese war effort, they may be returned to owners.

b. Technical and scientific apparatus, deemed essential, by responsible headquarters, for the investigation of the Japanese potential for war, and which is not now available from civilian firms or manufacturers, may be seized when needed. Compensation may be subject of future negotiation by proper authority.

c. Documents, files and libraries which have no immediate intelligence value but which may, however, serve as valuable background material for future studies of Japanese potentials may be seized when this is recommended by Washington Document Center (ADV).
